

Proven efficacy without the sticky residue.

Surgicept® is preferred by more hands in the OR.¹

Surgicept® WATERLESS
Surgical Hand Scrub

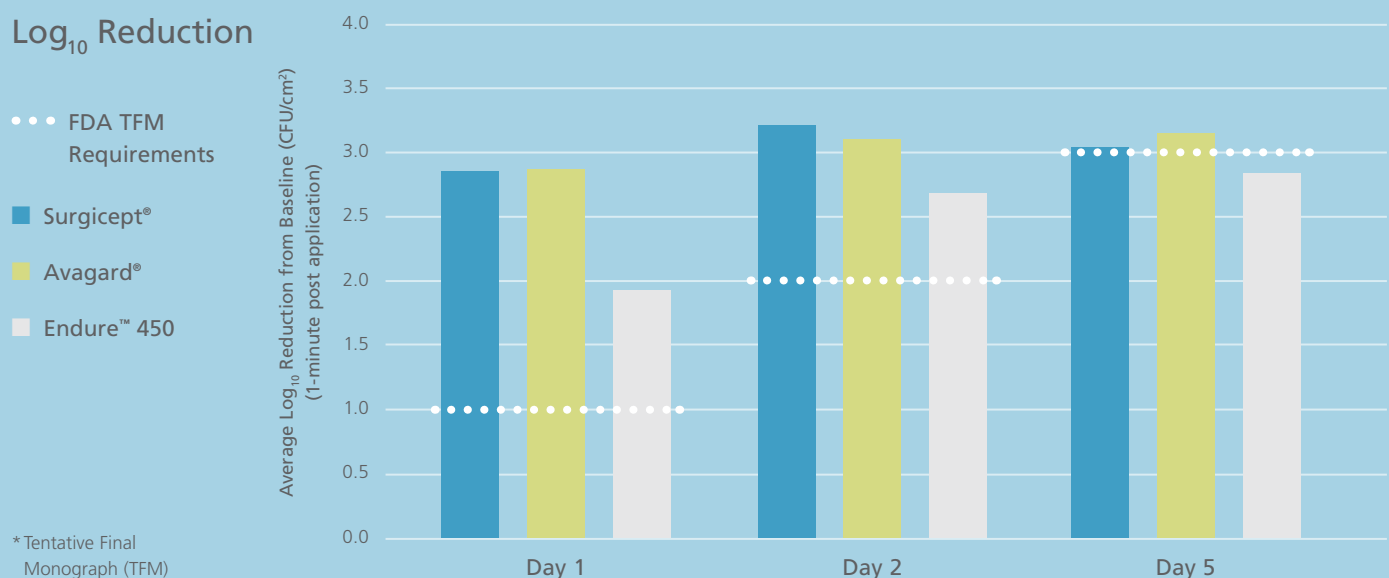

CareFusion

Surgicept® Waterless Hand Scrub – where surgical clean and comfort come together.

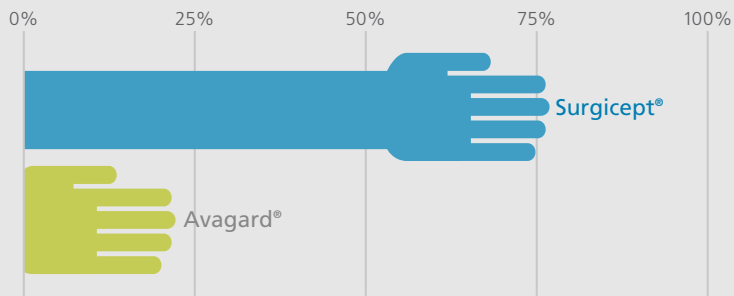

- Unique formula is proven to meet FDA's TFM surgical hand scrub guidelines²
- Provides rapid and persistent activity against hand flora
- Leaves hands feeling soft and smooth without the tacky buildup
- Dries quickly with no sticky residue, making gloving easier
- Formulated with unique combination of emollients to counter the drying effects of alcohol
- Meets CDC guidelines and follows AORN Standards and Recommended Practices

Proven to meet and exceed surgical scrub requirements.

Surgicept® Hand Antiseptic meets and exceeds FDA required surgical hand scrub testing standards* for immediate, persistent and cumulative reductions in resident and transient hand flora.² Surgicept is proven as effective as Avagard® Surgical Hand Antiseptic and prevents the regrowth of bacteria under gloved hands for up to six hours.²

78% of surgical staffers prefer quick-drying Surgicept®.¹

2X faster dry time

In a blind study, participants found Surgicept® Waterless Surgical Hand Scrub significantly more appealing than Avagard® Surgical Hand Antiseptic and rated Surgicept higher on each of the following qualities:¹

- Quicker dry time
- Easier gloving
- Less residue on skin
- Easier application process

Of those who preferred Surgicept, many favored its soft, smooth feel.

Surgicept dried in HALF the time compared to Avagard antiseptic (average of 32 seconds vs 64 seconds, respectively), after final product application.¹ This faster dry time means a shorter overall application time, which can lead to better adherence to hand hygiene guidelines.³

Convenience from the start.

Dispensing:

- Motion-activated dispenser provides accurate dosage delivery
- Reduces the risk of cross-contamination, controls product waste and facilitates proper hand antiseptic protocol

Glove Usage:

- Shorter dry time for faster, more efficient gloving
- No stickiness, finger slippage or loss of tactile feel that come with other waterless hand scrubs

Discover the soft, clean feeling of Surgicept®.

Surgicept Application Instructions:

Apply to clean, dry hands. Surgicept can be used for first scrub and every scrub of the day. For the first scrub of the day, clean under nails using a nail pick under running water.

Step 1

Dispense sufficient quantity of Surgicept® antiseptic to cover one hand (approximately 2mL*) into cupped palm. Dip the fingertips of your opposite hand into Surgicept and work under the nails. Spread remainder of Surgicept on hand and lower two-thirds of forearm.

Step 2

Repeat step 1 with other hand and forearm.

Step 3

Dispense an additional sufficient quantity (approximately 2mL) of Surgicept antiseptic, and apply to all surfaces of hands up to wrists, paying particular attention to the nails, cuticles and interdigital spaces. Rub hands until dry.

Allow to dry before donning gloves. Do not dry with towel.

*Dispenser releases 1mL at a time.

For Healthcare Personnel Handwash Use:

Wet hands thoroughly with Surgicept and allow to dry without wiping.

Do not use if you are allergic or have known or suspected hypersensitivity to any ingredient in this product. **Stop use and ask a doctor if** irritation, redness or allergic reaction occurs.
