

# Pyxis ScrubStation® system

Pyxis® Perioperative Solutions

When scrubs are lost, hospitals lose money. And it adds up quickly. In fact, it can cost the average healthcare facility tens of thousands of dollars a year. It also costs hospital staff precious time searching for replacements.

The Pyxis ScrubStation® system helps you automatically track, control and document scrub usage—all through an easy-to-use system of secure dispensing and return units:

- Provides secure access with optional Pyxis® BioID fingerprint, barcode, magnetic stripe and/or proximity card identification system
- Simplifies workflow with audible instructions and keyless entry
- Reduces stockouts through an automated system of inventory alerts and notifications
- Optimizes resource utilization with a fast and efficient fill process
- Offers configuration flexibility of return, dispensing or dual-function units

## Helping hospitals reduce losses and ensure scrub availability

The Pyxis ScrubStation® system automates the distribution and return of scrubs to help healthcare facilities of every size reduce losses and improve inventory tracking. Secure, convenient access to scrubs can be provided at a central location or multiple points in a facility, while enabling administrators to document usage and monitor inventory levels anywhere on the network.

With the ability to drill down to individual stations and users, you can identify ways to improve scrub usage, quickly locate scrub sets in appropriate sizes and generate reports that help track shipments to outsourced laundry services.

Meanwhile, you can avoid the time and frustration of searching for scrubs—freeing up time to focus more on patient care.

Pyxis ScrubStation® dispensing and return systems

Pyxis ScrubStation® integrated dispensing and return system

## Helping to improve workflow and financial performance

- Real-time networking across multiple locations and facilities
- Easy set-up and intuitive graphical interface
- Automatic alerts for low inventory levels and full return bins
- Global Find feature to locate scrub sets in a given size
- Simple, instant addition of wearers at stations or at the management console
- Reserved slots for specified users
- Variable capacity for low-, medium- and high-usage areas
